To grok: To know something profoundly and experientially – intellectually, emotionally and intuitively

“Our consciousness is how we perceive, know and act within the world. So, if we want to change the world, we first better understand and then change our consciousness”

– Edgar Mitchell, ScD

A new portal for information and tools about conscious evolution of wholeness

Knowledge and Wisdom Then and Now

Over the centuries, humanity has continuously demonstrated tremendous technological genius; the problem is the knowledge of ourselves, our understanding of our place on the earth and how we live together have not progressed commensurately and have totally outstripped our ethics and morality.

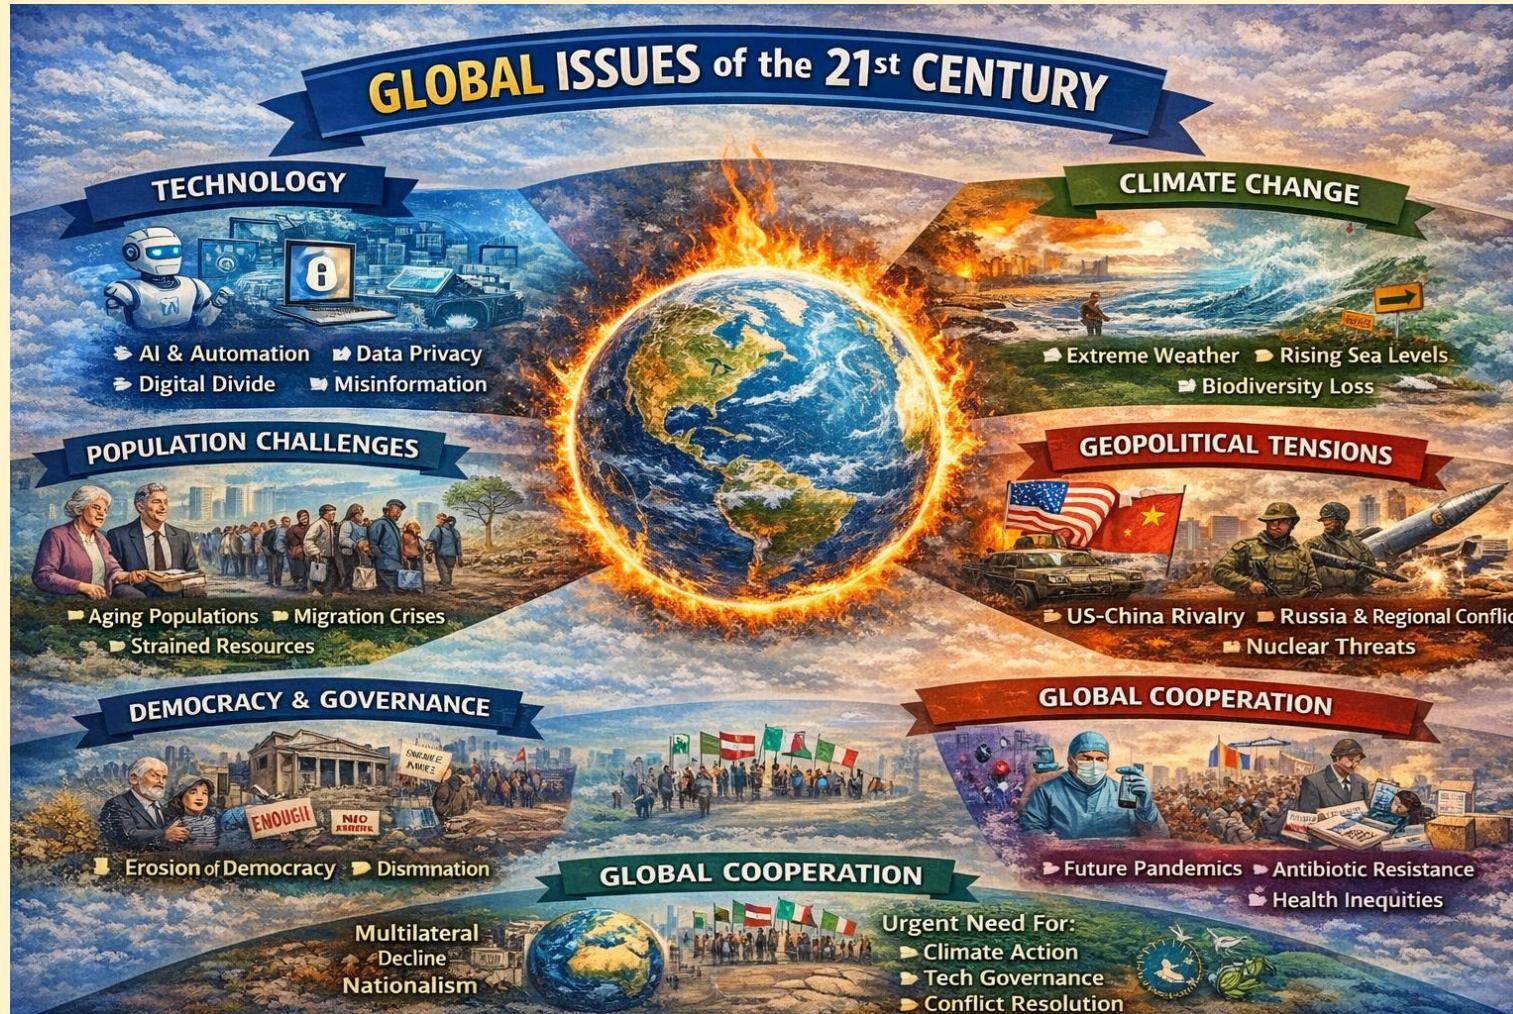

Society, Culture, Institutions and practices have not kept up with our technical knowledge & understanding

"The past will not suffice to govern the future, for the past is wrapped in ignorance and false beliefs about what is, however well the beliefs served their times at the time."

- Dr. Edgar Mitchell

Archaic practices, large population & powerful technologies are now affecting the entire ecosystem of the planet and our future

"For Homo sapiens has rewritten the rules of the game. This single ape species has managed within 70,000 years to change the global ecosystem in radical and unprecedented ways."

- Yuval Noah Harari

"Love and compassion are necessities, not luxuries. Without them humanity cannot survive."

- Mahatma Gandhi

Wisdom and understanding to complement technological knowledge and developments lag far behind culture & institutions

"It is in us to turn the course of mankind into a gentler and more abundant civilization. If not us – who? If not now – when?" - Edgar Mitchell

It's time for a new story based on the current understanding & wisdom of the modern world

“You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete.”

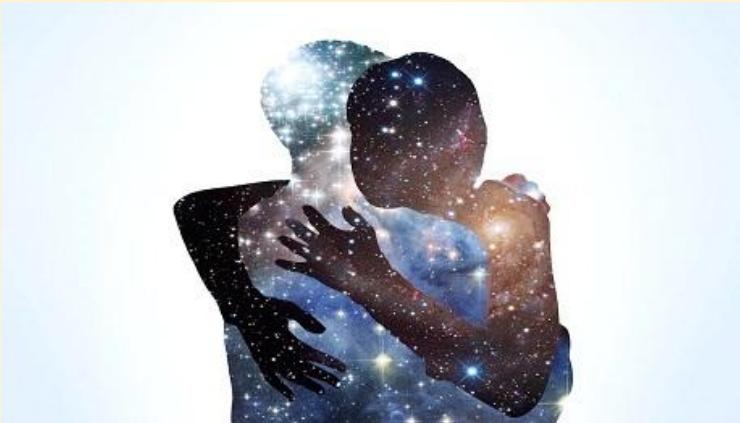

Buckminster Fuller

“When a complex system is far from equilibrium, small islands of coherence in a sea of chaos have the capacity to shift the entire system to a higher order.”

Ilya Prigogine,
Nobel Prize-winning
chemist

The new story must embody wholeness, oneness, equity & a new understanding of consciousness

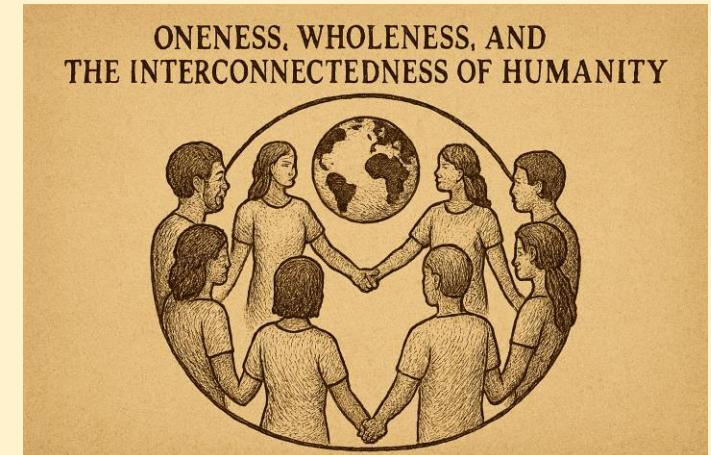

Convergence of science, spirituality, with interbeing, compassion, ethics and the new story

Understanding & embodying wholeness

Conscious Evolution by Sacred Activism

Tools & Methods for Groking Wholeness

The Components of Wholeness

Consciousness / Spirit

Wholeness with our consciousness, our spirit and higher self

Body / Mind

Wholeness with our body and our minds

Local Ecosystem

Wholeness with our home and our local ecosystem

Global Environment

Wholeness and sustainability with our global environment

Mission: to promote individual and collective well-being and transformation through information, inspiration, and practical skills that advance our inherent human potential. By doing so, we help catalyze a sustainable future for all planetary citizens.

Vision: a world that enhances well-being and reduces suffering for individuals, society at large, and all living creatures with whom we share the planet.

The Future of Humanity: Homo Noeticus - A new story with a new way of being

All meaningful and lasting change starts locally, then spreads globally. The challenge is to evolve in our body, mind, spirit and in our collective consciousness. The opportunity is to build a world which we all intuitively know we want to live in.
